Benzapon Atlantic
High concentrated detergent for hydrocarbon solvents

**PROPERTIES:**
- Perfect cleaning result even at low dosage
- Cost cutting due to reducing distillation sludge
- Neutral scent on cleaned garments
- Free of builder
- High water bounding capacity
- Improve significantly the dispersing properties of the solvent and prevents therefore any greying
- Can be even used as a pre-brushing agent

**APPLICATION:**

**Stock liquor**
1.0 – 1.5 ml Benzapon Atlantic per litre solvent in the working tank and filter (0.13 – 0.20 fl oz/gal)

**Topping-up additive**

*Machines without distillation*

Daily addition when starting the work (10 loads/day) = 1 ml Benzapon Atlantic per litre liquor in the tanks and filters

**1-bath method**

At least 25 % liquor exchange (extraction to the still) or distillation of the entire liquor in the work tank at the latest after 10 loads = 1 - 3 ml Benzapon Atlantic / kg garments (0.1 – 0.3 Vol.-%)

In the case of an intensive pre-brushing with Benzapon Pre the lowest dosage should be used.

**2-bath method**

With at least 50 % liquor exchange (1st bath completely to the still) = 5 ml Benzapon Atlantic / kg garments (0.5 Vol.-%) into the 2nd bath.

**Application of Benzapon Atlantic as pre-brushing agent**

If Benzapon Atlantic is used for pre-brushing, it should be diluted 1:2 to 1:5 with hydrocarbon solvent. Higher dilution rates are not stable (separation) and should be mixed freshly for usage.

For industrial use only. This information sheet is for guidance only. The data set out here are based on the current status of our knowledge and experience. They do not in any way absolve users of the need to carry out their own checks and tests for suitability of the products for the intended processes and purposes. The data in this information sheet do not represent assurance of properties and stability of the products we are to supply. Subject to technical modifications within reason. The current version of the EU Material Safety Data Sheet must also be observed.

BÜFA Reinigungssysteme GmbH & Co. KG - August-Hanken-Str. 30 - 26125 Oldenburg - Germany - www.buefa.de
**TECHNICAL DATA:**

- Density 20 °C (68 °F): 1.04 g/ml
- pH-value: 6.5 – 7.5
- Ionogenity: anionic
- Flashpoint: > 62 °C

**HINTS:**

**Storage**

Benzapon Atlantic is not sensitive to frost, but storing it for a longer period at temperatures below 10 °C (50 °F) it becomes viscous and slightly milky. It is fit for use again after warming up without any loss of quality. Keep container tightly closed. The product can be stored for at least 24 months in its original sealed packing.
