Blankit AR
Bleaching/stripping agent with optical brightener for textiles/furs/buttons

**PROPERTIES:**
- for the bleaching of wool, silk, cotton, viscose, polyamide and furs
- intense and stable effects of whiteness can be reached
- can be used as stripping agent for dyed buttons (metal-free) as well
- yellowish powder which is easily soluble in water

**APPLICATION:**
Dissolve 1 - 6 g/l Blankit AR (0.14 - 0.81 oz/gal) in water and heat up to approx. 30 - 60 °C (86 - 140 °F). The temperature depends on the kind of treated items. Then treat the articles - always stirring - for approx. 10 - 30 minutes. Subsequently rinse thoroughly.

*Remark:* Before using Blankit AR on delicate garments and textiles with poor colour fastness, we recommend to carry out a hem test. Use only working containers made of stainless steel or plastic.

*Caution:* When using Blankit AR, the optical brightener on the material to be treated can be irreversibly damaged.

Metals can turn dark during the bleaching process.

**TECHNICAL DATA:**
- Bulk weight: 1.25 kg/l
- pH-value (1%): 6.8 - 8.0

**HINTS:**
Storage
Store dry. After partial taking our close packing unit airtight again. Protect from direct sunlight. The product can be stored for at least 24 months in its original sealed packing.

For industrial use only. This information sheet is for guidance only. The data set out here are based on the current status of our knowledge and experience. They do not in any way absolve users of the need to carry out their own checks and tests for suitability of the products for the intended processes and purposes. The data in this information sheet do not represent assurance of proper properties and stability of the products we are to supply. Subject to technical modifications within reason. The current version of the EU Material Safety Data Sheet must also be observed.
