Idekolin

Post-spotting agent for stains originating from varnish, colour, fat and wax

PROPERTIES:
- post-spotting agent, water miscible
- cannot be used on acetate, triacetate and natural silk

APPLICATION:
Apply Idekolin on the moistened spotted area and allow a longer time to act in case of obstinate stains. Idekolin is even more effective if it is mixed with water in the ratio of approx. 2:1. Subsequently manipulate well with a spotting brush or spatula and flush with steam. Stains on the surface should be treated on the reverse side on an absorbing pad. On delicate garments and textiles with poor colour fastness a hem test is absolutely necessary prior to use.

TECHNICAL DATA:
- Density 20 °C (68 °F) 0.95 g/ml
- pH-value 7.5 - 8.5
- Ionogenity anionic

HINTS:
Storage
Recommended storage temperature +3 to +30 °C (+37.4 to +86 °F). Keep container tightly closed. The product can be stored for at least 24 months in its original sealed packing.
