Lizerna Alka
High alkaline, liquid laundry booster

PROPERTIES:

- Very high part of special complexing agents
- Improves the washing effect especially in case of a water hardness of > 14 °dH
- Binds even high quantities of iron ions
- Increases the pH-value of the washing liquor
- Accelerates fat saponification
- Considerably stabilisation of peroxides, hence much better bleaching effects
- Prevents precipitation of calcium and magnesium carbonate (limescale)

APPLICATION:
Depending on the degree of soiling: 1 - 3 ml/kg fabric

TECHNICAL DATA:

- Density (20°C): 1,47 g/ml
- pH-value (1 %): 12,5 – 13,5
- CSB (DIN ISO 15705): 46 mg O₂/ml (chemical oxygen demand)

HINTS:

Storage: After partial withdrawal out close packing unit tightly. The product can be stored for at least 24 months in its original sealed packing.
