Lizerna Finish
Concentrated hygiene softener and neutralizing agent

PROPERTIES:
- combination of softener, preservative and neutralization product
- efficient hygiene in the field of rinsing and pressing thanks to a wide range of action of the preservative
- prevents formation of bad smells and mould stains especially in case of storing damp textiles
- effective neutralization of alkalinity in the rinsing water and on textiles
- prevents the yellowing of textiles
- pleasant full feel
- good antistatic on blended fabrics
- high absorptive capacity
- excellent dermatological compatibility of the treated textiles (Cytotoxicity test according to ISO 10993-5)

APPLICATION:
Addition to the last rinsing bath
0.5 - 1.0 ml/kg dry garments (0.08 - 0.15 fl.oz/10 lbs)

TECHNICAL DATA:
- Density 20 °C (68 °F) 1.10 g/ml
- pH-value (1%) 2.00 - 2.50
- COD (DIN ISO 15705) 323 mgO2/ml

HINTS:
Storage
Lizerna Finish is not sensitive to frost, but it should not be exposed for a longer period to temperatures below 0 °C (32 °F). The product may tend to a slight cloudiness which does not have any influence on the effects at all. The product can be stored for at least 12 months in its original sealed packing.

For industrial use only. This information sheet is for guidance only. The data set out here are based on the current status of our knowledge and experience. They do not in any way absolve users of the need to carry out their own checks and tests for suitability of the products for the intended processes and purposes. The data in this information sheet do not represent assurance of proper properties and stability of the products we are to supply. Subject to technical modifications within reason. The current version of the EU Material Safety Data Sheet must also be observed.
