Neutracid Flüssig

Acid-binding special product for maintenance of perc

**PROPERTIES:**
- small solvent consumption demands a regularly solvent care to avoid reduction of stabilizers
- binds acid breakdown products (hydrochloric acid) and prevents corrosion in the dry cleaning
- binds free fatty acids and prevents unpleasant odours in solvent and textiles

**APPLICATION:**
The pH-value of the solvent should be measured in the water separator using pH paper or a measuring device. Check at least once a week.

Depending on the pH-value measured, the following dosage is recommended per 100 litre (10 gal) of solvent:

Neutracid Liquid is generally added to the distilling vessel as this is where the acid is formed by breakdown. In the case of direct input of acid via the textiles, e.g. when heavily soiled working clothes are being cleaned, it is better to add Neutracid Flüssig via the bottom trap.

**TECHNICAL DATA:**
- Density 20 °C (68 °F) 1.00 g/ml
- pH-value 10.0 - 11.0

**HINTS:**
- **Storage**
  Keep containers tightly closed. Store upright. The product can be stored for at least 24 months in its original sealed packing.
