Secapur Perfect

Concentrated anionic drycleaning detergent for the application in perc

**PROPERTIES:**
- possesses an excellent water-emulsifying and water-binding properties
- reduces the post-spotting thanks to its good cleaning capacity
- also suitable for pre-spotting
- acts antistatic and reviving
- can be used as drycleaning detergent for work-clothes made of polyester and cotton in combination with water dosages

**APPLICATION:**

**Stock solution**
1 - 2 ml Secapur Perfect per L solvent in the work tank and filter
(0.15 - 0.25 fl oz/gal)

**Topping-up additive**
*Single-bath method*
At least 25 % liquor exchange (extraction to the still) or distillation of the entire liquor in the work tank at the latest after 10 loads = 2 ml Secapur Perfect / kg garments (0.3 fl oz/10 lbs)

*Two-bath method*
With at least 50 % liquor exchange (1st bath completely to the still) = 4 ml Secapur Perfect / kg garments (0.6 fl oz/10 lbs) into the 2nd bath

**Application of Secapur Perfect as pre-brushing agent**
Depending on the sensitiveness of the fabrics to be treated, the product is pre-sprayed or pre-brushed on heavily soiled areas pure or diluted with water. Be careful when using this product on delicate garments. In case of doubt (especially in case of suspected colour fading) we recommend to carry through a hem test.

More information on the process technology you can find in our brochure: “Use of Textile Care Agents in Dry-cleaning”
For industrial use only. This information sheet is for guidance only. The data set out here are based on the current status of our knowledge and experience. They do not in any way absolve users of the need to carry out their own checks and tests for suitability of the products for the intended processes and purposes. The data in this information sheet do not represent assurance of properties and stability of the products we are to supply. Subject to technical modifications within reason. The current version of the EU Material Safety Data Sheet must also be observed.

BÜFA Reinigungssysteme GmbH & Co. KG - August-Hanken-Str. 30 - 26125 Oldenburg - Germany - www.buefa.de

**TECHNICAL DATA:**

- Density 20 °C (68 °F): 1.00 g/ml
- pH-value: 7.0 - 8.0
- Ionogenity: anionic

**HINTS:**

**Storage**
Secapur Perfect is not sensitive to frost, but storing it for a longer period at temperatures below 0 °C (32 °F) it becomes viscous and can even solidify. It is fit for use again after thawing without any loss of quality. Keep container tightly closed. The product can be stored for at least 24 months in its original sealed packing.
